

About Webdiscount

Internet Service Provider

Webdiscount has been in business as an internet service provider since 1996. Initially started providing webdesign/programming works, we have continuously grown adding new business fields such as webhosting, dedicated web servers, etc.

With growing customer-base we open a datacenter in Virginia (USA) in 1998. Amsterdam and London are added in 2001/2002 as additional sites to provide webhosting and dedicated servers.

Interxion datacenter in Frankfurt has been added in 2003 (DE-CIX location) and Redbus in 2004. All datacenters have been interconnected with our own fiber capacities since 2005 and are seamlessly integrated into our network. With strategic partnerships to DSL carriers in Germany and abroad, we can offer ADSL/sDSL leased-lines and VPN networks nationwide and in a number of European countries.

Datacenter

Have us invite you to take a tour in any of our professional datacenter locations. During the tour you can discuss any questions with our employee and make sure our services fit your needs.

Please contact us to arrange an appointment.

Choose your location

Our Business-Housing and Business-Colocation offers are available at a number of different locations at the same prices. Not all additional services are available in all sites. We're constantly expanding our network into new datacenters.

- Muenster, Germany
- Frankfurt am Main, Germany
- London, Great Britain
- Amsterdam, Netherlands
- Alexandria (Virginia), USA

Our offers are valid only for registered businesses. All prices excluding VAT. Errors and omissions excepted.
